

# 43" 4K Ultra HD Touch Monitor

The perfect solution to display the latest digital newspapers available to bookmakers from industry leading software providers.

Offering a more flexible and manageable alternative to printed newspapers, the 4K touch screen display delivers sharp high-resolution content, with small, yet perfectly readable, fonts.

Manufactured with robust materials, toughed glass with a thickness of 6mm, and industrial grade LED, these touch monitors provide high performance and professional design. Complimented by low power consumption, 16/7 continuous use, and an ultra-thin body, they offer an excellent multi-touch interactive experience.
